

# Make regulatory evidence computable.

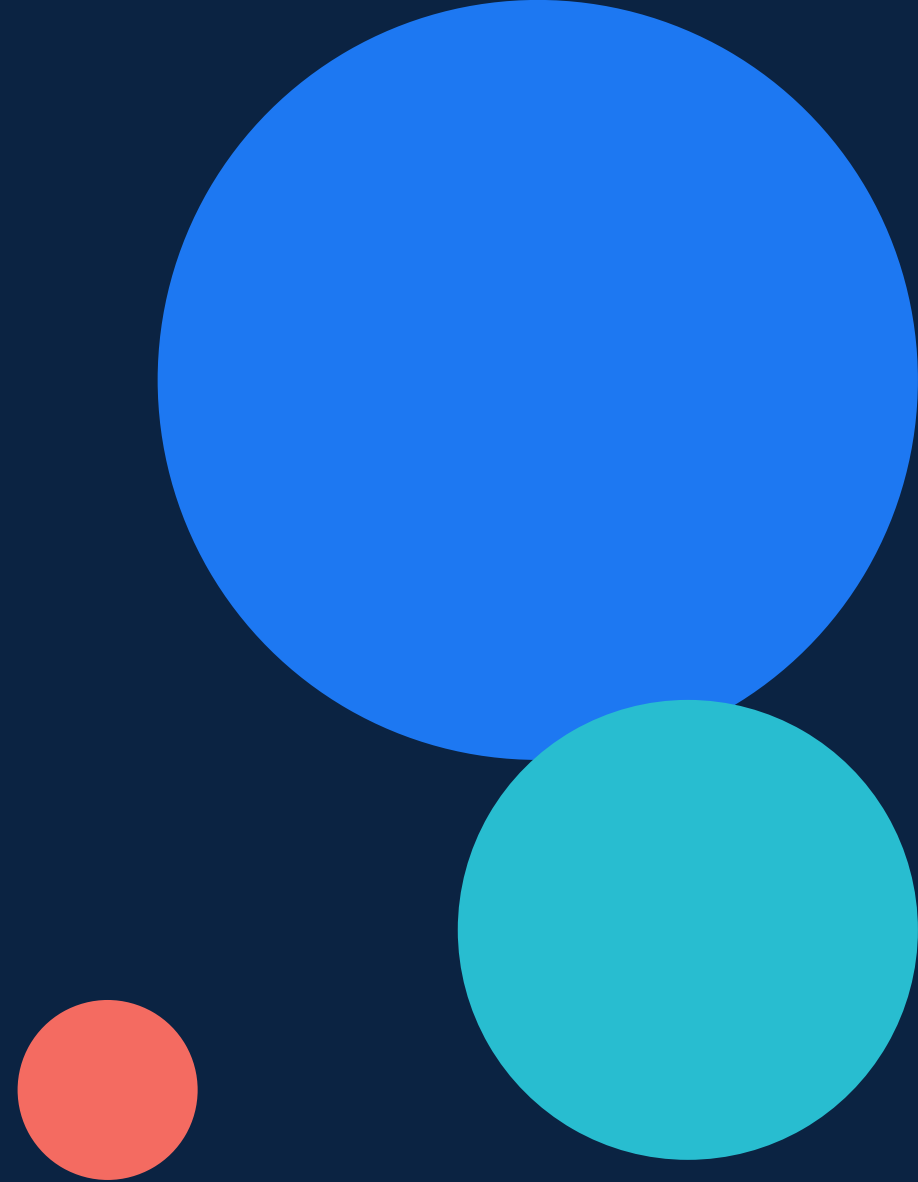

From official source to reviewer-ready indicator output — with the evidence still visible.

**27 / 27**

known indicator checks recovered

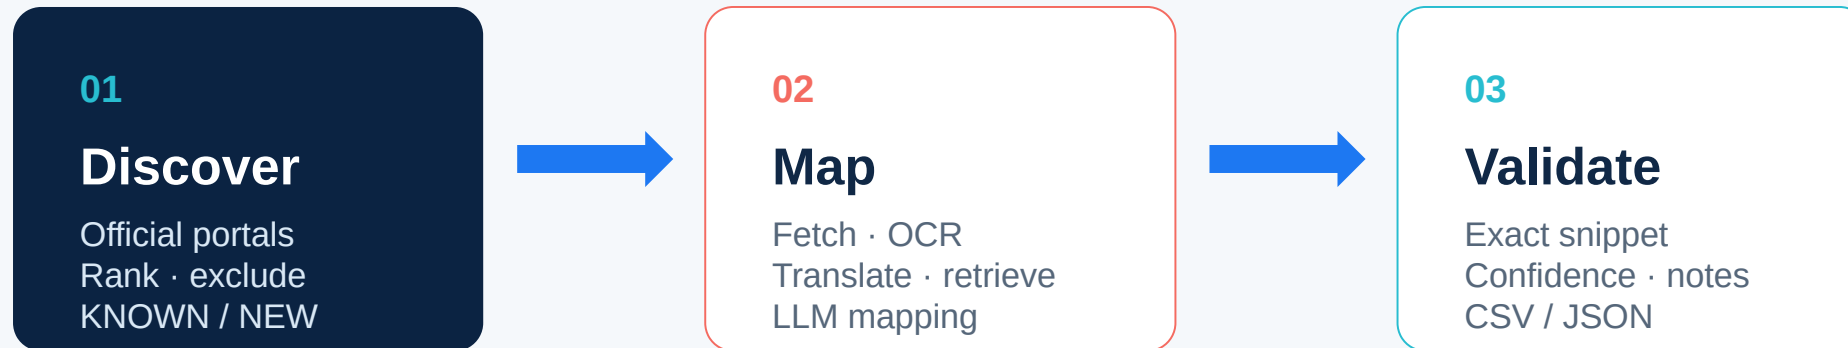

**\$0.43**

recorded Singapore P7 model cost

# The hard part is not finding laws. It is proving what they say.

RDTII separates discovery from mapping so every output can be traced back to an official source.

source → provision → indicator → reviewer-ready output

# One official Act, two traceable RDTII results

The engine preserves the source text while distinguishing new discoveries from known checks.

OFFICIAL SOURCE

## Personal Data Protection Act 2012

Singapore Statutes Online

sso.agc.gov.sg · exact source text retained

NEW

### P7-I3 · Section 50(4)

One-year investigation-record retention  
· confidence 0.92

KNOWN

### P7-I4 · Section 11(3)

Designated data-protection function ·  
confidence 0.98

## THE NEXT FRONTIER

# What if a trader could ask: 'Can I ship this from A to B?'

The same evidence engine can grow into a trade-intelligence layer.

### NOW

Multiple pillars  
Multiple economies

### NEXT

HS code  
Origin + destination

### THEN

Official laws, regulations  
and trader steps

One engine → broader coverage → actionable trade guidance

Built on official sources.
